[See more people you may know »](#)

Use “People you may know” to open interesting profiles (by Control-click’ing on the person’s [name](#)), creating a string of new tabs:

Open the tab for a potential connection and, if you’re short on time but want to pursue, select their LinkedIn ID (highlighted in yellow, below), copy, and paste it to an “Interesting LinkedIn profiles” file. I have 1700+ in mine.
